VAL SABBIA

LASTORIA

Il patron della nostra azienda, Vittore Bianchi vanta una ricca e lunga esperienza nel settore artigianale. I suoi esordi lavorativi lo hanno visto impegnato nel campo dell'automotive, dove ha affinato le sue naturali doti di curiosità e dedizione per il proprio lavoro e per il prodotto che era intento, di volta in volta, a realizzare. Chiusa questa prima esperienza, si è avvicinato, in qualità di agente di vendita di un prodotto ausiliario (le vernici) al mondo delle maniglie e delle realtà che le producevano. In quella fase, sul finire degli anni Settanta, la terra d'origine di Vittore era già conosciuta come uno dei più importanti distretti industriali delle maniglie. Centinaia di operatori della vallata, con migliaia di collaboratori, erano impegnati in questo settore, espressione del Made in Italy. L'innata curiosità di Vittore ha portato a fondare una azienda che effettuava lavorazioni per conto terzi, nell'ambito dell'articolata filiera produttiva delle maniglie. Questa

prima esperienza imprenditoriale era nata durante uno dei periodi più dinamici del distretti delle maniglie valsabbino: non mancavano certo le occasioni per ampliare il proprio business a chi, come Vittore, era dotato di spirto d'intraprendenza. Non è un caso infatti che in nostro fondatore abbia partecipato a fiere e rassegne internazionali del settore, con l'obiettivo di comprendere le esigenze e le specifiche richieste degli operatori internazionali, che erano a contatto con i clienti – aziende e privati – fruitori finali delle maniglie. Forte di questa esperienza, Vittore fonda nel 1986 la Fimet, acronimo di Finitura Metalli. In quell'anno il mercato di riferimento delle produzioni della nuova azienda era quello tedesco ma ora, a distanza di quasi un trentennio dagli esordi, i mercati raggiunti e serviti dalle produzioni dell'azienda della famiglia Bianchi sono oltre venti. I figli di Vittore sono impegnati attivamente nella ditta, Luca è responsabile della qualità e della produzione, mentre Marica è responsabile delle vendite. Il carattere familiare dell'azienda è infatti il suo punto di forza “non ci limitiamo a produrre maniglie, ma ne curiamo ogni aspetto, dalla ideazione fino alla finitura, siamo orgogliosi di rappresentare il made in Italy”.

HISTORY

The owner of our company, Vittore Bianchi has a rich and long experience in the craft field. First he has been engaged in the automotive field, where he honed his natural curiosity and dedication to its own work and for the product that he was concentrated, from time to time, to realize. Closed this first experience, he approached, as a sales agent of an auxiliary product (paint), the world of handles and the realities that produced them. At that stage, in the late seventies, the birthplace of Vittore was already known as one of the most important industrial areas of the handles production. Hundreds of entrepreneurs in the valley, with thousands of employees, were engaged in this sector, expression of Made in Italy. The innate Vittore's curiosity, combined with his entrepreneurial spirit, led him to found a company which carried out work for third parties, as part of the articulated

chain of the handles production. This first experience was born during one of the most dynamic districts handle Val-sabbia: there were some opportunities to expand the business to those who, like Vittore, was endowed with the spirit of enterprise. It is no coincidence that our founder has participated in international exhibitions and fairs of the sector, with the aim to understand the needs and the specific requirements of international operators, who were in contact with the final customers. Based on this experience, Victor founded in 1986 Fimet, acronym of metal finishing. In that year the reference market of the new company was the German one but now, after almost thirty years from the beginning, the markets reached and served by the company of the Bianchi family are over twenty. The children of Vittore are actively involved in the company, Luca is responsible for quality and production, while Marica is responsible for sales. The family nature of the company is its strong point "we do not just produce handles, but we take care of everything from conception to finish, we are proud to represent the Made in Italy".

MODERNO

CLASSICO

I valori aziendali di FIMET sono qualità, design unico e sostenibilità.

Il catalogo Moderno è in continua evoluzione con nuove linee complete per ogni soluzione, allo stesso tempo è sempre alla ricerca di innovativi colori.

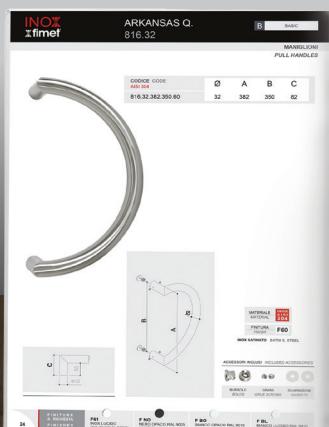

Trova la tua Linea Perfetta anche nei cataloghi Classico, Inox e su tutta l' Accessoristica.

FIMET corporate values are quality, unique design and sustainability.

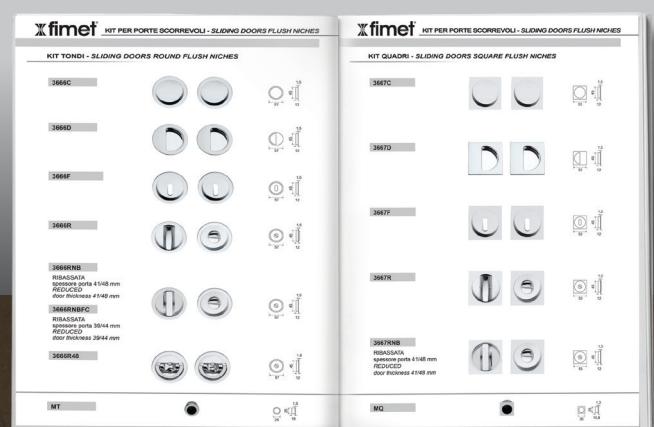

The modern range catalogue is constantly evolving, and the Company is at the forefront of developing new lines suitable for any purpose, with new innovative colors and coatings.

Find the right line you need also in our Classic, Inox and Accessories catalogues.

BELLEZZA

A PORTATA DI MANO

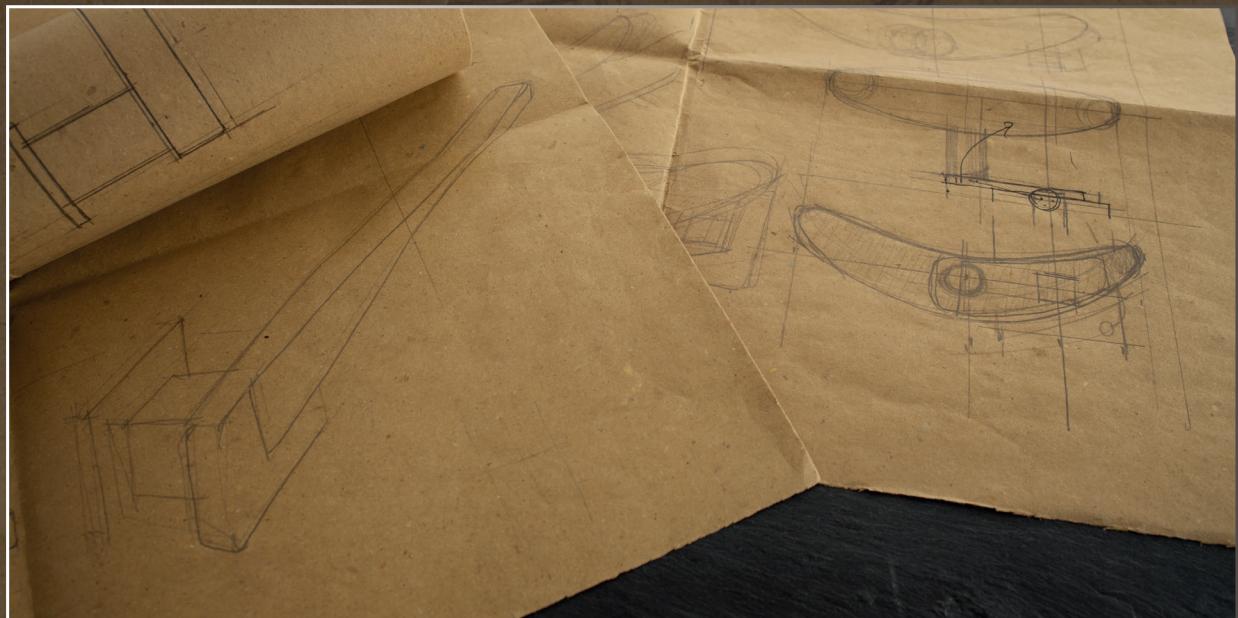

Come da migliore tradizione italiana, per la creazione e prototipazione delle ns maniglie ci avvaliamo di artigiani e designer.

La ns collaborazione consiste nello sviluppare insieme a loro nuove idee di maniglie, fare i prototipi e studiare le modifiche necessarie a renderle adatte alla commercializzazione.

As in the best Italian tradition, for the creation and prototyping of our handles we employ craftsmen and designers.

Our collaboration is to develop with them new ideas for handles, make prototypes and study the changes needed to make them ready for commercialization.

Art. 208

Art. 213

Montaggio semplice e sicuro grazie all'innovativo centratore per il ferro quadro, con in più la garanzia della sotto-rosetta in metallo, abbinabile sia alla copertina tonda che a quella quadrata. La sotto-rosetta, dotata di fori vite ad interasse 38 mm, è disponibile con bussole sporgenti oppure rasata. La copertina in metallo viene fornita montata con l'impugnatura tramite un'affidabile molla testata per 200.000 aperture. L'assieme viene mantenuto in posizione dai grani di fissaggio presenti sulle impugnature.

This new system is featured by an easy and safe assembly system, thanks to the innovative adapter for the square spindle. Everything is besides guaranteed by the metal under-construction, which can be matched both with the round and the square covers. The under-construction has two 38mm interax screw holes, and they are available either with or without bulging bolts. Lever handle and metal cover are supplied mounted together with a reliable spring, tested for more than 200.000 openings. The whole set is held in position by the lever handles' fixing grub screws.

ART. 273

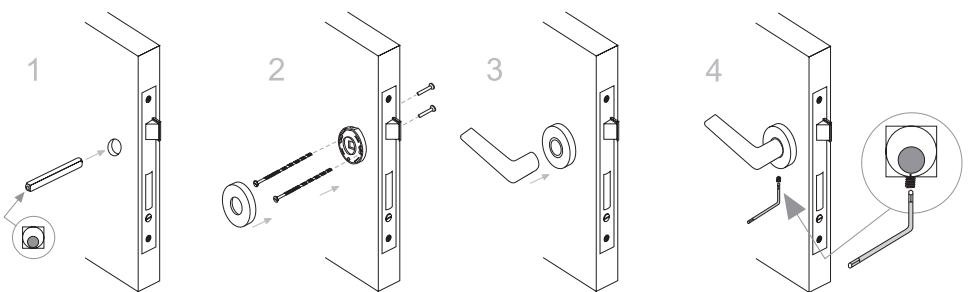

ASSEMBLY SYSTEM A

- 1) Inserire il ferro quadro nella serratura, rivolgendo la fresa o il foro verso la posizione del foro grano presente sulla maniglia.
- 2) Posizionare la maniglia montata sulla sotto-rosetta in plastica e fissare con le viti in dotazione.
- 3) Posizionare la copertina a pressione sulla sotto-rosetta.
- 4) Avvitare il grano della maniglia nell'apposito foro finché non si blocca.

- 1) Insert the square spindle into the lock. The square spindle's milling or the hole has to be pointed to the handle's grub screw hole.
- 2) The handle, mounted on the plastic under-rose, must be positioned on the door, and fastened with the screws.
- 3) Clip the cover rose on the under-rose.
- 4) Fasten the grub screw in the handle's designated hole, until it stops.

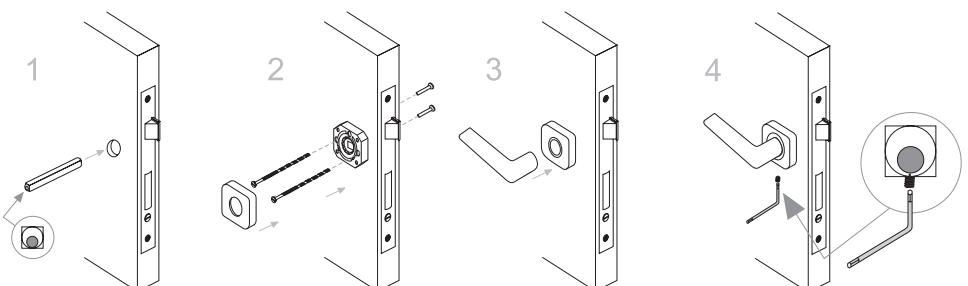

ASSEMBLY SYSTEM B

- 1) Inserire il ferro quadro nella serratura, rivolgendo la fresa o il foro verso la posizione del foro grano presente sulla maniglia.
- 2) Posizionare la sotto-rosetta (provvista di molla incorporata) in asse con il ferro quadro, fissare con le viti in dotazione. Dopodiché, posizionare la copertina a pressione sulla sotto-rosetta.
- 3) Posizionare la maniglia.
- 4) Avvitare il grano della maniglia nell'apposito foro finché non si blocca.

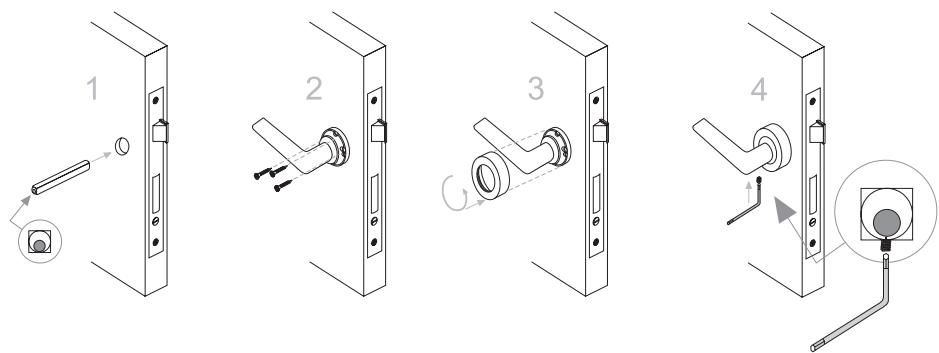

- 1) Insert the square spindle into the lock. The square spindle's milling or the hole has to be pointed to the handle's grub screw hole.
- 2) Position the built-in spring under-rose aligned with the square spindle, then fasten with the screws. Clip the cover rose on the under-rose.
- 3) Position the handle.
- 4) Fasten the grub screw in the handle's designated hole, until it stops.

ASSEMBLY SYSTEM C

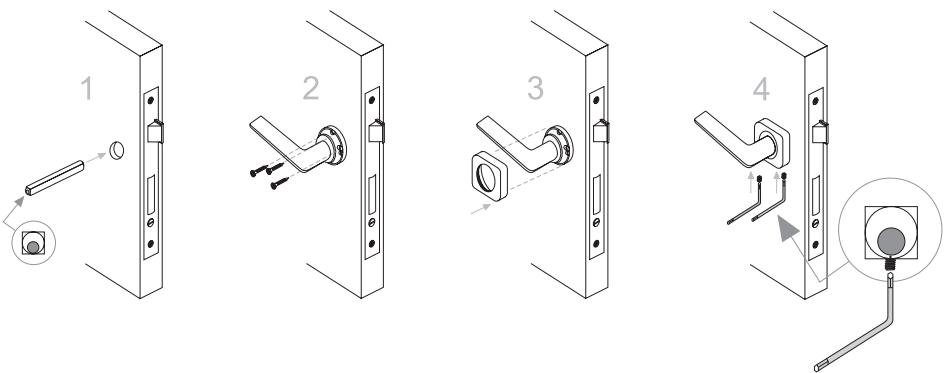

- 1) Inserire il ferro quadro nella serratura, rivolgendo la fresa o il foro verso la posizione del foro grano presente sulla maniglia.
- 2) Posizionare la sotto-rosetta (provvista di molla incorporata) in asse con il ferro quadro, fissare con le viti in dotazione. Dopodiché, posizionare la copertina a pressione sulla sotto-rosetta.
- 3) Posizionare la maniglia.
- 4) Avvitare il grano della maniglia nell'apposito foro finché non si blocca.

- 1) Insert the square spindle into the lock. The square spindle's milling or the hole has to be pointed to the handle's grub screw hole.
- 2) Position the built-in spring under-rose aligned with the square spindle, then fasten with the screws. Clip the cover rose on the under-rose.
- 3) Position the handle.
- 4) Fasten the grub screw in the handle's designated hole, until it stops.

ASSEMBLY SYSTEM D

- 1) Inserire il ferro quadro nella serratura, rivolgendo la fresa o il foro verso la posizione del foro grano presente sulla maniglia.
- 2) Posizionare la maniglia montata sulla rosetta interna in metallo e fissare con le viti in dotazione.
- 3) Avvitare l'anello sulla rosetta interna.
- 4) Avvitare il grano della maniglia nell'apposito foro finché non si blocca.

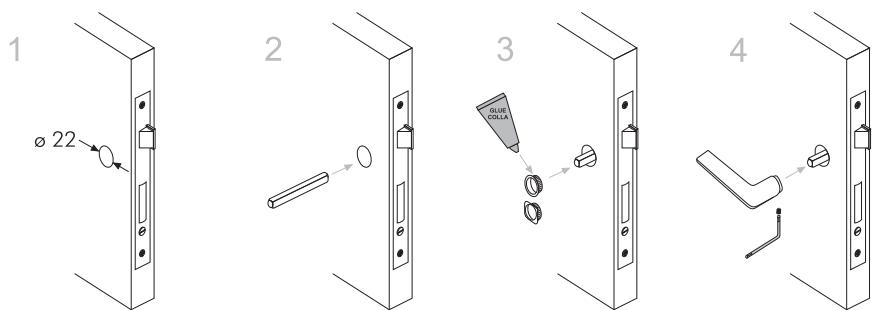

- 1) Insert the square spindle into the lock. The square spindle's milling or the hole has to be pointed to the handle's grub screw hole.
- 2) The handle, mounted on the inner metal rose, must be positioned on the door, and fastened with the screws.
- 3) Screw the ring on the inner rose.
- 4) Fasten the grub screw in the handle's designated hole, until it stops.

ART. 211BIC**ASSEMBLY SYSTEM E**

- 1) Inserire il ferro quadro nella serratura, rivolgendo la fresa o il foro verso la posizione del foro grano presente sulla maniglia.
- 2) Posizionare la maniglia montata sulla rosetta interna in metallo e fissare con le viti in dotazione.
- 3) Posizionare l'anello quadrato sulla rosetta interna, facendo particolare attenzione a mantenere la posizione in asse e il foro grano nella parte inferiore.
- 4) Fissare l'anello con il grano finché non si blocca. Avvitare il grano nell'apposito foro della maniglia finché non si blocca.

- 1) Insert the square spindle into the lock. The square spindle's milling or the hole has to be pointed to the handle's grub screw hole.
- 2) The handle, mounted on the inner metal rose, must be positioned on the door, and fastened with the screws.
- 3) Position the square ring on the inner rose. Position has to be aligned and ring's grub screw hole has to stay in the lower part.
- 4) Fasten the ring's grub screw until it stops. Fasten the grub screw in the handle's designated hole, until it stops.

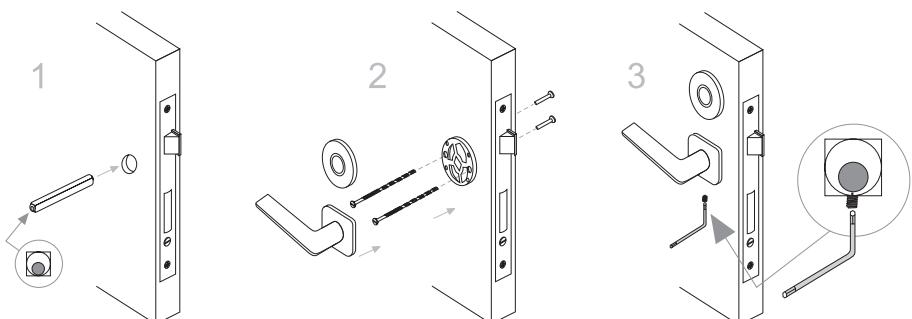

ASSEMBLY SYSTEM MINI

- 1) Eseguire un foro di 22 mm di diametro nella porta.
- 2) Inserire il ferro quadro nella serratura, rivolgendo la fresa o il foro verso la posizione del foro grano presente sulla maniglia.
- 3) Apporre una piccola quantità di colla sul diametro esterno della rosetta (sulla parte che andrà inserita nella porta) ed inserirla nel foro sulla porta.
- 4) Posizionare la maniglia, e fissarla sul ferro quadro avvitando l'apposito grano finché questo non si blocca.

- 1) Drill a 22 mm diameter hole into the door.
- 2) Insert the square spindle into the lock. The square spindle's milling or the hole has to be pointed to the handle's grub screw hole.
- 3) Put a small quantity of glue on the rose's outer diameter (on the part that will be inserted in the door). Insert the rose in the door.
- 4) Position the handle, then fasten the grub screw in the handle's designated hole, until it stops.

ASSEMBLY SYSTEM H5

- 1) Inserire il ferro quadro nella serratura, rivolgendo la fresa o il foro verso la posizione del foro grano presente sulla maniglia.
- 2) Posizionare la sottorosetta in metallo e fissarla con le viti in dotazione.
- 3) Posizionare la maniglia montata sulla copertina sulla sottorosetta e avvitare il grano nell'apposito foro della maniglia finché non si blocca.

- 1) Insert the square spindle into the lock. The square spindle's milling or the hole has to be pointed to the handle's grub screw hole.
- 2) Position the metal under-rose aligned with the square spindle, then fasten with the screws.
- 3) Position the handle mounted on the rose cover on the metal under-rose and fasten the grub screw in the handle's designated hole, until it stops.

QUALITÀ E MANUTENZIONE

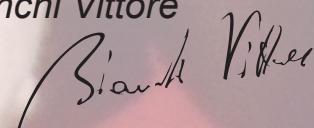

Tutti i prodotti FIMET sono prodotti in conformità alle norme ambientali e con materiali di alta qualità, come da migliore tradizione italiana. La superficie dei prodotti può essere alterata da clima umido con alta percentuale di salinità, piogge acide, solventi, escursioni termiche e l'esposizione ai raggi ultravioletti. I nostri prodotti sono quindi sottoposti a test in nebbia salina in modo da ottenere un dato di riferimento per le nostre garanzie. Il test viene condotto in condizioni ottimali, dove le maniglie sono esposte solo alla nebbia salina. Pertanto, al fine di garantire il risultato ottenuto si consiglia di non utilizzare detergenti corrosivi e detergenti abrasivi o altri prodotti per la pulizia contenenti acido muriatico per la pulizia delle maniglie, ma solo un semplice panno morbido con acqua. Si consiglia inoltre di evitare di installare le maniglie quando l'ambiente è stato appena dipinto, perché l'esalazione della vernice può indebolire la superficie. Anelli, chiavi e oggetti appuntiti, in generale, possono danneggiare la superficie.

Le nostre finiture hanno raggiunto i seguenti risultati nel test in nebbia salina:

<i>Ottone verniciato in cataforesi</i>	<i>oltre 250 ore</i>
<i>Bronzo verniciato in cataforesi</i>	<i>oltre 250 ore</i>
<i>Cromo galvanizzato</i>	<i>oltre 250 ore</i>
<i>Nickel verniciato</i>	<i>oltre 250 ore</i>
<i>RAL</i>	<i>oltre 250 ore</i>

Inoltre i nostri prodotti sono garantiti per 10 anni contro i difetti meccanici se installati correttamente. FIMET garantisce i propri prodotti esclusivamente quando vengono utilizzati in conformità con le cure necessarie. Danni superficiali causati da uso improprio o ad un'errata installazione non sono coperti da questa garanzia, né sono coperti il normale scolorimento dovuto all'usura o corrosione. Fimet non può in nessun caso essere ritenuta responsabile per danni derivanti da qualsiasi altra causa.

QUALITY AND MAINTENANCE

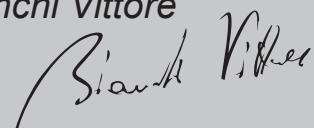

All Fimet products are produced in compliance with environmental rules and with high quality materials, as per best Italian tradition. The surface of the products can be altered by humid climate with high percentage of saltiness, sour rains, solvents, thermal excursions and exposure to ultraviolet rays. Our products are therefore submitted to salt spray test in order to obtain a reference data for our guarantees. The test is carried on optimal conditions, where the handles are exposed only to salt spray. Therefore, in order to guarantee the result obtained, we recommend not to use corrosive detergent and abrasive cleaners or other cleaning products containing muriatic acid when cleaning the handles, but only a plain smooth cloth with water. We recommend also to avoid installing the handles when the room has just been painted, as the exhalation of the varnish can weaken the surface. Rings, keys, and sharp object in general can damage the surface.

Our finishing have reached the following results in the salt spray test :

Cataphoresis varnished brass	beyond 250 hours
Cataphoresis varnished bronze	beyond 250 hours
Galvanized chrome	beyond 250 hours
Galvanized lacquered nickel	beyond 250 hours
RAL	beyond 250 hours

Moreover our products are guaranteed for 10 years against mechanical defects when installed correctly. Fimet guarantees its products solely when used in compliance with the necessary care. Surface damages caused by misuse or wrong installation are not covered by this warranty, nor are covered normal wear discoloration on finished or corrosion. Fimet can't in any case be held responsible for damages resulting from any other cause.
